

# Module 0

Jeffrey Woo

MSDS Program, University of Virginia

Fall 2022

# Agenda

- Welcome
- Live session protocol
- Some logistical tips
- Q&A on Protocol and Policies
- Q&A on Modules A & B (Review material)
- Q&A on Module 1(?)

# Welcome

- Remind me to record the live session!
- Put yourself on mute unless you want to speak.
- Recommended: Have your video turned on.
- There is a “raise hand” button for you. Click on “Reactions” in the panel at the bottom, the button should then appear on the right panel.
- Please have your name showing on the participants list. To change, move mouse over your video image, click on the ... icon and select rename. No twitter handles or street names.
- Log in using your UVa account.

## Preparing for Live Sessions

- Complete readings, take notes, take note of questions that you have.
- View R tutorial.
- Take ungraded Check Your Understanding quiz.
- Read through guided question set, and start thinking about the questions.
- Pretty much follow the order of the material presented on Collab.
- If you are not able to attend a live session please let me know ahead of time!
- **Advise:** spread the module over the week rather than squeezing in everything in one or 2 days or the last minute.

# Live Session Protocol

- Q&A based on readings of module.
- For some modules, I will prepare some additional materials to present.
- Small group discussion of guided question set in breakout rooms. You are not expected to be 100% correct in your answers!
- Large group discussion of guided question set, any other questions that pop up during small group discussion.

## After Live Session

- Complete HW (due Monday, day before next live session). I recommend completing a day or two after our live session so you have time to start prepping for the next module.
- Materials for next module opens on Collab. Start preparing for next live session.

# Submitting Assignments

- All assignments are due at 11:59pm Eastern on the day they are due, unless otherwise stated.
- All assignments due via Assignments, unless otherwise stated.
- You should be able to edit your submission as many times as needed until the due date.
- You may notice an extra hour listed as “Accept Resubmission Until”. This is a one hour grace period if you run into computer issues. Do not make a habit of turning in work during this one hour grace period.

# Submitting Assignments

- Homeworks due Mondays. Submit via assignments. Please check the guidelines for homeworks.
- Due dates for summative assessments (Exam, Projects) on overview page. These weeks still have homework due so will be busier.

**WARNING:** Collab does not work well when you open multiple tabs. If you upload your HW with multiple tabs open, your submission is likely to screw up! You can always check if the submission went through correctly, and you can resubmit if needed.

# Groups

- Modules 1 to 4.
- Modules 5 to 8, and Project 1
- Modules 9 to 12, and Project 2

## Getting help...

- Office hours on Zoom: Mondays 7:30 to 8:30pm (start Sep 5)
- GTA office hours on zoom: Thursdays 7:30 to 8:30pm (start Sep 1)
- Discussion forums.
- Email is to be used for more personal questions.
- We can also set up time to meet on Zoom if a discussion is needed.

## Getting help...

- Q&A time during Tuesday live sessions should be used for the material for that module or for HW that was just turned in.
- Office hours on Mondays and Thursdays are not / less structured.
- Sometimes I need time to come up with a way to explain your question, and may ask that you post the question on the discussion forum.
- Discussion forum preferred over email.
  - Your question can benefit other students as well!
  - I can type math equations on the discussion forum, not via email.
  - The discussion forum actually reminds me when I don't reply.

## Comment about Modules

- Later modules build on previous modules.
- Later modules reinforce concepts from previous modules.
- Concepts from early modules reappear later on.

# Q&A

- Any questions?
- Logistical?
- Modules A & B?
- Other things?

# To Do List

- Finish reviewing Module B (Aug 24)
- Start prepping for Mod 1 Live session
- Introduce yourself in the Course Welcome tab in Collab
- Finish reviewing Module A (Sep 7). This is long so you may want to start now. Need to complete this before working on Module 3.
